

AltaGas – Operator 1, Townsend

Location: Townsend, BC

Salary: \$90,300 – 132,000/ year

Schedule: 10 on 10 off working days & nights

Safety Sensitive: Yes

Join a high-performing operations team at the Townsend facilities, a major gas-processing operation located approximately 125 km northwest of Fort St. John and designed to process up to 550 mmscfd of raw sweet gas. Reporting to and taking day-to-day direction from the Townsend Lead Operator, this role is responsible for assisting in the daily operations of the Townsend facilities and plays an essential part in maintaining safe and efficient operations. This is a camp-based position, with transportation provided from Fort St. John to the facility. Preference will be given to candidates who currently live in the Fort St. John area or who are willing to relocate to Fort St. John for this opportunity.

Tasks and Responsibilities

- Assists in the daily operation of the Townsend facilities, working the 12-hour day/night shift schedule.
- Responsible for the safe and efficient operation of the facility.
- Assists in the safe and efficient operation of all scheduled and unscheduled work including: operations, repairs and maintenance.
- Assists in commissioning, turnaround planning, and start-ups.
- Adherence to all AltaGas Policies, Standards, Procedures and Practices.
- Ensures plant production and reliability.
- Recognizes and avoids inappropriate risks, considers the consequences and impact and consults with senior personnel before taking action.
- Report and investigate facilities' safety incidents.
- Update and develop operating procedures.
- Participates in critical job check lists, job hazard assessments and safe work permitting.
- Assists and participates in EH&S meetings & inspections.

Qualifications, Skills & Abilities

- Grade 12 education or equivalent
- Minimum 4th Class Power Engineering certificate. Preference will be given to a person that holds a 3rd Class Power Engineering certificate.
- Minimum 5+ years of experience working in facility/pipeline operations.
- Gas plant and power generation experience would be considered an asset.
