

Job Description – Planter

Position Title:

Planter

Project:

Native Planting Program – Grandmothers Greenhouse

Contract:

June – August (*timeframe may vary to accommodate operational needs*)

Position Summary:

The Planter is responsible for the installation of native plant material in accordance with project specifications. This is a physically demanding field role requiring consistent productivity, attention to detail, and the ability to work long hours in varying terrain and weather conditions.

Key Responsibilities:

- Install native plants according to technical specifications and planting standards
- Achieve daily production targets of approximately **500–700 plants per day**
- Maintain proper planting techniques including depth, spacing, root placement, and soil compaction
- Handle plant material carefully to maintain viability and prevent damage
- Follow direction from Crew Boss and Plant Supervisor
- Support daily logistics including plant distribution and field setup
- Maintain a clean and organized work area
- Adhere to all health, safety, and environmental requirements

Qualifications and Experience:

- Minimum **3 years of planting experience** (tree planting or native restoration preferred)
- Proven ability to meet production targets in field environments
- Experience working in remote or rugged terrain
- Drivers License is a must
- Experience operating a UTV
- Experience working away from home and in a camp

Physical Requirements:

- Ability to work 12-hour days for extended periods
- High level of physical fitness and endurance
- Ability to carry equipment and plant material over uneven terrain
- Comfortable working in all weather conditions

Key Competencies:

- Strong work ethic and reliability
- Attention to detail
- Ability to work effectively in a team environment
- Adaptability in dynamic field conditions
